

SECTION 01 35 23

HOT WORK OPERATIONS

Note: This section is intended to include general procedural requirements for hot work operations (above and underground).

PART 1 GENERAL

1.01 REQUIREMENTS INCLUDED

- A. Before initiating hot work, the Builder shall submit the Hot Work permit application which can be obtained from FIU's Department of Environmental Health & Safety - <http://www2.fiu.edu/~ehs>. Hot Work Permit is included as FIU Form 07. Hot Work includes, but is not limited to, work above and below ground, involving open flames or work producing heat and/or sparks (including, but not limited to, brazing, cutting, grinding, soldering or thawing materials, torch applied products, installation and welding).

PART 2 PRODUCTS

Not used.

PART 3 EXECUTION

- 3.01 All tradesmen operating on FIU/State of Florida property whose work entails open flame cutting, welding or similar hot work shall not proceed with such operations until the safety of the work area has been approved by the FIU Department of Environmental Health & Safety through the FIU Project Manager. The provisions of this directive shall apply to any operation involving open flames or producing heat and/or sparks.

END OF SECTION
