PROJECT FACT SHEET
Social Sciences International Building, BT-835
Florida International University, University Park

PROJECT DESCRIPTION

The proposed building will jointly house International Studies and the International School. The building should provide a striking physical symbol of the international dimension of the University’s mission and identity. It should provide a state-of-the-art venue for the many activities – classes, lectures, workshops, performances, conferences, and faculty and graduate student research that constitute the agendas of its occupants. It should invite faculty, students, and others to linger over their work, and to interact over lunch, coffee, or casual conversation. It should impress the constant stream of prominent foreign visitors that find their way to FIU. It also should enhance the external reputations of the centers and institutes, departments, and school that inhabit it.
