

## SECTION 08 71 00 FINISH HARDWARE

### PART 1 GENERAL

#### 1.01 SECTION INCLUDES

- A. Finish hardware items required for swinging doors indicated on schedules and/or shown on drawings including hinges, lock or latch sets, dead locks, cylinders, bolts, exit devices, push/pull units, closers and miscellaneous door and access control devices, protection plates, and other miscellaneous hardware.

#### 1.04 SUBMITTALS

A. General Requirements:

1. Submit detailed finished hardware schedule in accordance with Section 01300
2. Before ordering any materials, prepare and submit shop drawings of all hardware materials on complete hardware schedule to Project Consultant for review.
3. At the completion of review, make corrections as directed and resubmit the corrected schedule for final approval and one (1) final copy hand delivered to FIU Key Control office W3-100.
4. Approval of schedule will not relieve Contractor of the responsibility for furnishing all necessary hardware, including the responsibility for furnishing correct quantities.
5. After hardware schedule has been approved, furnish templates required by manufacturing contractors for making proper provisions in their work for accurate fitting, finishing hardware setting.
6. Furnish templates in ample time to facilitate progress of work.
7. Door numbers and hardware groups are not to be changed.

B. Schedules:

1. Schedules are to be formatted in a "Vertical format" as per (DHI) "Document Sequence"
2. Schedule shall be complete, including type, manufacturer's name and number, and finish of each item required.
3. Electrical Hardware and Access Control must also be included with operation description for openings.

C. Product Data:

1. Product data sheets or catalog cuts are required with schedule submission.

D. Templates:

1. Furnish templates required for fabrication of Hollow Metal frames, aluminum and glass doors, or other related to hardware.

E. Certification:

1. Subject notarized certification indicating that hardware furnished for labeled doors have attached label as per NFPA 80

F. Wiring Diagrams:

1. All electrical hardware and electronic hardware provided must include diagrams, riser, and point to point information.

#### 1.05 Quality Assurance

A. Supplier Qualifications:

1. Hardware supplier shall be engaged regularly in contract hardware work and be staffed to expedite work. The firm shall have been furnishing hardware on similar projects in the vicinity for not less than five (5) years. At owners, request supplier must send qualified representative to the job site to entangle any mishaps. The supplier must have, in its employ, an Architectural Hardware Consultant (AHC) as certified by (DHI).

B. Installer Qualifications:

1. Installers must have a minimum (5) five years experience of installing commercial grade hardware. Prior installation installer must attend a pre-installation class with hardware manufactures.
- C. Make occasional inspections and verify that items are properly used, installed, and in correct location. Report improper application of hardware to Owner.
- D. Ensure the provision, proper coordination and functioning of finish hardware required for all openings, whether or not hereinafter listed in the detailed schedule, including proper type of strike plates, length of spindle, hand, backset and bevel of locks, hand and degree opening for closers, length of kick plates, length of rods and flush bolts, type of door stop and other functions or mechanism to meet the requirements of the project.
- E. Once building has been acquired by the owner, and has operated for (6) six months. Installer must return to adjust any or all hardware for proper operation.

#### **1.06 DELIVERY, STORAGE, AND HANDLING**

- A. Send duplicate lists of hardware in each shipment to the contractor. Ensure original list accompanies shipment. Hardware Vendor: pay shipping and delivery charges.
- B. Coordinate delivery of hardware to respective shops of subcontractors as required. Ensure timely delivery of hardware components.
- C. Hardware: sorted and delivered to jobsite marked to correspond with item numbers of vendor's approved schedule and be specific as to exact opening and other locations for which items are packaged. Each door opening: receive separate item number of hardware schedule.
- D. Check all shipments to insure proper accessories and templates.
- E. Deliver hardware only after detailed schedule, and samples have been approved.
- F. Provide secure lock-up for hardware delivered to the project. Control handling and installation of hardware items which are not immediately replaceable so that the completion of the work will not be delayed by hardware losses.
- G. Protection:
  1. Leave protective coatings when at all possible.

#### **1.07 WARRANTY**

- A. All hardware and installation must provide warranty against defects and workmanship; refer to Division 1 for proper clarifications.
- B. Mechanical Locks and Electronic Access Locks: Warranted in writing by the manufacturer against failure due to defective materials and workmanship, for a period of five (5) years commencing from the Date of installation
- C. Other Electronic Hardware (Power supplies, EL/RX/LX switches, etc.): Warranted for one (1) year from Date of Purchase.
- D. Overhead Door Closers: Warranted in writing by the manufacturer against failure due to defective materials and workmanship, for a period of ten (10) years commencing on the Date of

Final Completion and Acceptance, and in the event of failure, the manufacturer is to promptly repair or replace the defective with no additional cost to the Owner.

## **PART 2 PRODUCTS**

### **2.01 MANUFACTURER'S**

#### A. Manufacturer's Acceptable

HAGER  
McKINNEY  
BOMMER  
STANLEY  
FALCON LOCK CO.  
VON-DUPRIN  
SCHLAGE ELECTRONICS  
LCN  
GYLNN JOHNSON  
H.B. IVES CO.  
PEMKO  
NATIONAL GUARD  
REESE  
ZERO

### **2.01 MATERIALS AND FABRICATION**

- A. Material: Use manufacture's standard metal alloy as specified and by ANSI A156 series standards. Stainless Steel material and finish 630 (US32D) when provided by manufacture for said products listed; 626 (US26D) may also be an alternative.
- B. Fasteners: Provide hardware manufacture to conform to published templates, generally prepared for machine screw installation. Do not provide hardware, which has been prepared for self-tapping sheet metal screws, except, as specifically indicated.
- C. Furnish screws for installation, with each hardware item. Provide Phillips flat-head screws except as otherwise indicated. Finish exposed (exposed under any condition) screws to match hardware finish or, if exposed in surfaces of other work to match finish of such other work, including "prepare for paint" in surfaces to receive painted finish.
- D. Provide thru-bolts (sex bolts) for high traffic and heavy-duty use areas for doors not prepared for machine screws (staving, extra plating) for closers, panic and fire exit devices, stops and holders.
- E. Tools and Maintenance Instructions for Maintenance: Furnish a complete set of specialized tools and maintenance instructions as needed for owner's continued adjustments, maintenance, and removal and replacement of finish hardware. Return all unused material to owner, (Key Control).

### **2.02 HINGES AND BUTTS**

- A. Domestic manufacture equal to Hager, Ives, Stanley, McKinney, and Bommer.

- B. Quantity: Use 1.5 pair three (3) hinges for each door leaf up to and including 7'-6" in height doors over 7'-6' add an additional 0.5 pair one (1) hinge and 0.5 pair one (1) hinge for each door leaf 40 inches to 48 inches in width.
- C. Ensure all doors equipped with closers are furnished with ball bearing (BB) hinges.
- D. Size, Type and Finish: Provide the following unless otherwise noted in the hardware group.
  - 1. Exterior Doors with Closers: BB1199 4-1/2 inches x 4-1/2 inches with Non Removable Pins (NRP) BHMA 630 satin stainless steel finish.
  - 2. Interior Doors: BB1279- 4-1/2 inches x 4-1/2 inches BHMA 652 steel satin chromium finish.
  - 3. Interior Doors with Closers: BB1279 4-1/2 inches x 4-1/2 inches BHMA 652 steel satin Chromium finish for door leaf up to and including 36 inches wide.

### 2.03 LOCKS AND LATCHSETS

- A. All Locksets: Falcon Lock Company. **No Substitutions Allowed.**
  - 1. All locks to be "MA" series, SN design, and or D111 deadbolt.
  - 2. Provide Falcon Restricted "M" or "Q" keyway for **all** cylinders. "T" keyway for Biscayne Campus.
- B. Lock Trim, Latch Face and Strike Finish: BHMA 626 stainless steel chromium plated satin finish.
- C. Functions as designated in hardware sets.
- D. Provide all mechanical, electrical, custodial storage and any area deemed to be hazardous to the visually impaired, with door levers having tactile warning; manufacturers standard eight (8), applied to the exterior lever.
- E. Provide plastic strike boxes at all interior and exterior frames, and all double doors inactive leaf.

### 2.04 KEYS AND KEYING

- A. All cylinders to be shipped "0" bitted. No keys or cylinders will be delivered to or any authorization letters issued for receiving shipments other than to Owner, FIU.
- B. All locks are delivered less cylinder to contractor. Contractor to provide temporary construction cylinders.
- C. Ensure all locks and cylinders are **Falcon Lock standard cylinder 7-pin "M" or "Q" Restricted Keyway. "T" Restricted keyway for Biscayne Campus.**
- D. Ensure that at no time, the General Contractor or sub-contractor has possession of the permanent keys.
- E. Upon completion of the Project, the Owner will Install all cylinders and collect all construction keys and temporary cylinders, construction cylinders are to be provided and installed by contractor.
- F. Provide three (3) change keys per lock.

## 2.05 CLOSING DEVICES

- A. All hydraulic door closers (including those having electric releases) furnished by one (1) Manufacturer and guaranteed for ten (10) years.
- B. All Closers:
  - 1. LCN 4041XP EDA Series having non-ferrous covers, forged steel arms separate valves for Adjusting backcheck, closing and latching cycles and adjustable spring to provide sizes One (1) through six (6).
  - 2. Provide parallel arm mount on all doors opening into corridors or other public spaces and mounted to permit 180 degrees door swing wherever wall conditions permit.
  - 3. Provide with non-hold open arms unless otherwise indicated.
- C. Door Closer Cylinders:
  - 1. Only high strength cast iron construction to provide low wear operating capabilities of internal parts throughout the life of the installation.
  - 2. Tested to ANSI/BHMA A 156.4 test requirements by a BHMA certified testing laboratory.
  - 3. Provide a written certification showing successful completion of a minimum of 10,000,000 cycles.
- D. Door Closers:
  - 1. Utilize temperature stable fluid capable of withstanding temperature ranges of 120 degrees Fahrenheit to minus 30 degrees Fahrenheit, without requiring seasonal adjustment of closer speed to properly close the door.
  - 2. Closers for Fire-Rated Doors: Provide with temperature stabilizing fluid that complies with the standards UBC 7-2 (1997) and UL10C.
  - 3. Incorporate tamper resistant non-critical screw valves of V-slot design to reduce possible clogging from particles within the closer.
  - 4. Have separate and independent screw valve adjustments for latch speed, general speed, and hydraulic back check.
  - 5. Properly locate so as to effectively slow the swing of the door at a minimum of 10 degrees in advance of the dead stop location to protect the doorframe and hardware from damage.
  - 6. Pressure Relief Valves (PRV) are not acceptable.
- E. Ensure all components are powder coated including the cylinder and have passed a 100 hour salt spray test.
- F. Provide all accessories necessary for proper operation of doors including drop plates. Provide Spring Cush arms where auxiliary stops not feasible.
- G. Door closers shall be thru-bolted

## 2.06 PANIC AND FIRE EXIT DEVICES

- A. Devices:
  - 1. Von Duprin 98/99 and 33A/35A Series.
  - 2. Ensure devices are listed under "Panic Hardware" in accident equipment list of Underwriters Laboratories.
  - 3. All labeled doors with "Fire Exit Hardware" must have labels attached and be under strict provisions of Underwriters Laboratories.

- B. Exit Devices: Tested to ANSI/BHMA A 156.3 test requirements by a BHMA certified testing laboratory. Provide a written certification showing successful completion of a minimum of 1,000,000 cycles.
- C. Surface Strikes: Roller type and come complete with a plate underneath to prevent movement. Provide with a dead-latching feature to prevent latch bolt tampering.
- D. Provide Von Duprin 98L/99L,33A-L/35A-L, key retracted latch bolt and 996L-R-17 or 360L-17 trim with number 425 sex bolts, as noted in the hardware groups.
- E. Exit Devices or Panic Devices on an entry to access a building equipped with AD exterior trim and an RX-LC switch in device for Access Control System also provide controllers, readers, power transfers, interface board and power supply for each and every door except for exit only doors; only Von Duprin is to be used.

## **2.07 PUSH, PULL, KICK, MOP, AND ARMOR PLATES**

- A. Push Plates: Ives 8 inches x 16 inches, US32D Finish.
- B. Pull Plates: Ives 8305-0 4 inches x 16 inches, US32D Finish.
- C. Kickplates: Provide on push side of doors with closers, but not on closer/holder doors unless scheduled otherwise. 10 inches high, 0.050 thick, bevelled on all exposed edges and sized per below:
  - 1. Single Doors: 2 inches LDW (less door width).
  - 2. Pairs of Doors: 1 inches LDW (less door width).
- D. Mop plates: 6 inches high, 0.050 thick beveled on all exposed edges and sized per below:
  - 1. Single Doors: 2 inches LDW (less door width).
  - 2. Pairs of Doors: 1 inches LDW (less door width).
- E. Armourplates: 34 inches in height, 0.050 thick, bevelled on all exposed edges and sized per below:
  - 1. Single Doors: 2 inches LDW (less door width).
  - 2. Pairs of Doors: 1 inches LDW (less door width).
- E. Finishes: Stainless steel, BHMA 630.
- F. Provide stainless steel screws.
- G. Coordinate with ADA and other accessibility code requirements.

## **2.08 EXTENSION FLUSH BOLTS AND AUTOMATIC FLUSH BOLTS**

- A. Provide extension flush bolts as manufactured by H.B. Ives, Model FB458, UL Listed, 12 inches. US26D finish. Doors over 7'-6" provide 18 inches.
- C. Provide automatic flush bolts as manufactured by H.B. Ives, Model FB30 or FB40, UL Listed, US32D finish use appropriate model for door type and undercut,
- D. Provide H.B. Ives, Model DP1, dust proof strike and DP2 plate with screws and lead shields.

## 2.09 WALL AND FLOOR DOOR STOPS

- A. Provide H.B. Ives, WS406 wall stop in US32D Finish, where doors in an open position parallel a masonry wall.
- B. Provide H.B. Ives, WS407 wall stop in US32D Finish, where doors in an open position parallel a metal stud board wall.
- D. Provide H.B. Ives, 443,444,447,448 B26D for heavy duty door stops when wall exceeds more than 8 inches from a 90-110 degree open door.

## 2.10 WEATHERSTRIPS, SWEEPS, DRIP CAPS, AND THRESHOLDS

- A. Rigid Jamb and Head Weatherstrip: Aluminum mill finish, neoprene bulb insert, stainless steel screws. UL10C Listed. Manufacturers: Pemko 290A, Reese 815A, National Guard 160A, Zero International 328A.
- B. Door Bottom Sweeps: Clear anodized aluminum finish, neoprene insert, stainless steel screws. Manufacturers: Pemko 315CN, National Guard 200NA, Reese 323A, Zero International 39A.
- C. Door Top Rain Drip:
  - 1. Provide only when doors are exposed to rain.
  - 2. Clear anodized aluminum finish, neoprene insert, stainless steel screws.
  - 3. Manufacturers: Pemko 346C, National Guard 16A, Reese 201A, Zero International.
- D. Saddle Threshold and Threshold Stop Strip (Two-Piece Assembly): Aluminum threshold with mill finish, neoprene bulb insert stainless steel screws. Manufacturers: Pemko 271A threshold and 290A threshold stop, National Guard 513 threshold and 700E stop, Reese 5405A threshold and 854A threshold stop, Zero International 544A.
- E. Saddle Threshold (Interior Use): Aluminum mill finish, stainless steel screws. Manufacturers: Pemko 151A, National Guard 413, Reese 263A, Zero International 544A.
- F. Carpet/Special Purpose Threshold: Aluminum mill finish. Manufacturers: Pemko 2364A, National Guard 404, Reese S562A, Zero International 1684A.
- G. Latching Panic Exit Saddles: Aluminum mill finish. Manufacturers: Pemko 2005A, National Guard 896A. Reese S250, Zero 65.

## 2.11 SOUNDPROOFING

- A. Automatic Door Bottoms: Surface mounted, clear anodized aluminum, stainless steel screws. Manufacturers: Zero International 369A. with Z49 Mounting for cleaning
- B. Head and Jamb Sound Seals: Clear anodized aluminum, stainless steel screws. Manufacturers: Zero International 328AA.

## 2.12 ACCESSORIES

- A. Surface Mounted Overhead Door Holder/Stop: Provide Glynn-Johnson 70H/S Series Extra Heavy Duty Hold Open/Stop Model, US26D Finish.
- B. Electromagnetic Door Holders:
  - 1. Surface Wall Mounted Magnets:
    - a. Provide LCN Type SEM Model 7850 standard profile recesses wall mount, 120 Volt, aluminum finish.
    - b. Provide through bolted mounting for holder armature to door with sex bolts and mounting plate.
  - 2. Door Closer/Holder: Provide LCN Model 4040 SE Series surface mounted closer/holder without detector.
- C. Coordinator:
  - 1. Provide units as manufactured by H.B. Ives, Model COR with filler bar as required.
  - 2. US28 (Aluminum) finish.
- D. Astragal: Clear anodized aluminum finish, stainless steel screws. Manufacturers: Pemko 357C, National Guard 139A, Reese 183C.
- E. Door Hasp: Provide 6 inch long, galvanized, thru-bolted.
- F. Dutch Door Bolt: Provide H.B. Ives model number 054MB, US26D finish.
- G. Door Silencers: H.B. Ives number SR64.
  - 1. Provide three (3) rubber silencers per single door.
  - 2. Provide two (2) rubber silencers per pair of doors.
- H. One-Way Door Viewers: Provide H.B. Ives Model Number 698.
- I. Padlocks: Provide Falcon Lock 955 w/ 2 inch clearance.
- J. Miscellaneous Locks and Cylinders: Provide approved Falcon cylinders and keyways for entrance doors, gate locks and electrical switches.

### 2.13 ELECTRIFIED HARDWARE PRODUCTS

- A. Electronic Locks and Access Control:
  - 1. Manufacture is **Schlage Electronics. No Substitutions Allowed.**  
All products must be AD series trim with RX-LC switch equipped exit devices.  
All entry doors; Wood, Metal, or Aluminum, must be equipped with Access Control and hardwired with all power supplies and controllers and must be permanently installed in a Telicom Closet for later networking. Doors and Frames with AD300 must be factory prepared for Von Duprin EPT-10 Power Transfer and Wire Raceway.
- B. Mortise Locks AD300-MS – MSK SPA-LDFA7-626
- C. Von Duprin Exit Trims:AD300-993--70-MSK-SPA-LDFA7-626

- D. Power supply: Provide correct power supply required from manufacture to ensure proper installation. Von Duprin PS914 900-4RL power supply. Supply 900-FA Fire Alarm relay were required by Code. **ALL ACCESS CONTROL POWER SUPPLIES AND OR CONTROL PANELS MUST BE TIED TO THE EMERGENCY GENERATOR ELECTRICAL CIRCUIT.**
- E. Power transfers: Von Duprin EPT-10, lockset, or, exit device.
- F. Use the SMR-20 card reader at Storefront openings
- G. **ALL AD LOCKSETS AND CARD READERS TO BE SUPPLIED AND INSTALLED BY SECURITY INTEGRATION DIVISION 28.**  
General Contractor shall subcontract a licensed (State of FI, Miami Dade Co.) Security integration contractor. Whom shall furnish; install a full integrated system. Including but not limited to wiring, card lock, termination & programming. For any questions regarding the integration related information & details contact Key Control or FIU.

### PART 3 - EXECUTION

#### 3.01 INSPECTION

- A. Examine openings scheduled to receive hardware. Repair openings requiring corrective work prior to installation of hardware.

#### 3.02 INSTALLATION

- A. **No hardware is to be installed until the hardware manufacturers have provided a pre-installation class. This is to insure proper installation of the specified products.**
- B. Apply and install all hardware under provisions of the Finish Hardware Schedule. Exercise care not to mar or damage adjacent Work.
- C. Install hardware under provisions of manufacturer's installation instructions; unless otherwise indicated.
- D. Contractor:
  - 1. Provide a secure lock-up for hardware delivered to the project but not yet installed.
  - 2. Control the handling and installation of hardware items that are not immediately replaceable, so that the completion of the Work will not be delayed by hardware losses both before and after installation.
- E. Placement of Hardware: Install hardware at following heights and locations (unless otherwise indicated, heights are shown from finish floor to center line of item)
  - 1. Hinges: Standard Placement
  - 2. Cylindrical Lockset: 36 inches
  - 3. Deadlock/Deadlatch: 48 inches maximum

4. Push Plate: 48 inches
  5. Pull Plate: 42 inches
  6. Panic Bar: 36 inches
  7. Kick Plate: 1/4 inch from door bottom
- C. Closer: Per manufacturer's template to give maximum degree of opening. Mount closers on room side of door. All door closers shall be thru-bolted
- D. Stops and Holders:
1. Wall: On block wall or stud wall where knob or pull hits.
  2. Overhead Door Holder: Per template.
  3. Door Holder: 2 inches from lead edge of door.

### **3.03 ADJUSTING AND CLEANING**

- A. Contractor: Adjust all hardware under strict provisions of manufacturers' instructions. Prior to turning project over to Owner, clean and make final adjustments to the finish hardware. Once building has operated for six (6) months, contractor must return for adjustments on finished hardware.

### **3.04 PROTECTION**

- A. Contractor: Protect all hardware, as it is stored on construction site in a covered and dry place. Protect exposed hardware installed on doors during the construction phase. Leave protective coating when possible and remove at owner's request.

### **3.05 DESCRIPTION OF HARDWARE GROUP NUMBERS**

- A. The following schedule is to be used as a general guide. Special or unusual conditions not covered will have hardware of similar type and quality to meet job conditions. Supply hardware to meet project requirements and produce complete project.

# AUXILIARY LOCKS

LOCK FEATURES • D100 SERIES • GRADE 1

## D100 Heavy Duty Deadlocks 1" Bolt Projection

**Door Thickness:** 1-3/8" to 1-3/4". Up to 2-1/4" door thickness also available.

**Backsets:** 2-3/8" - 2-3/4" adjustable deadbolt.

**Attachment:** Locks are solidly attached to the door by 1/4" heat-treated steel bolts. These bolts pass through a steel plate (D111, D121 and D141) or the inner cylinder housing (D131) and thread directly into the back of the outer cylinder housing.

A permanent cap is inserted over the inside cylinder (D131) making the bolts nearly impossible to remove.

**Handing:** Non-handed. May be used on right hand or left hand doors swinging in or out.

**Cylinders:** Furnished with solid brass plug and housing, drilled with 6-pin chambers, pinned in 5 unless otherwise specified. Also available with 7-pin cylinders. Available with 6 or 7-pin interchangeable cores. Furnished with two (2) nickel silver keys standard.

**Keyways:** "G" keyway standard on conventional cylinders. "A" keyway standard on 1/C core cylinders. Also available with some optional keyways.

**Exposed Trim:** Wrought brass or bronze reinforced with steel insert.

**Deadbolts:** Deadbolt locks are furnished with deadbolts which have a full 1" projection. Housed within the deadbolt is a free-turning, 1/4" thick, hardened steel, saw-resistant roller. Furnished standard with 2-3/8"- 2-3/4" adjustable backset and 1-1/8" x 2-1/4" faceplate. Optional 1" x 2-1/4" faceplate. Consult Options and Accessories section for other optional faceplates. D100 bolt is high strength steel.

**Strikes:** 2-3/4" x 1-1/8" lipless strike standard. ANSI 4-7/8" x 1-1/4" lipless, 2-1/4" full lip strikes, a 2-3/4" x 1-1/8" T-strike or a security strike are available. Consult Options and Accessories section.

**Screws:** Furnished with wood/machine screws for use on wood or metal doors or frames.

**ANSI/BHMA Standard:** A156.5, 2001, Grade 1.

**ANSI/BHMA:** Meets ANSI/BHMA 156.13, Series 1000.

**UL:** 3 hour A label.

### Falcon Mortise Lock Specifications

- Provide mortise locksets that comply with ANSI A156.13, Series 1000, Operational Grade 1 and Security Grade 1 with all standard trims and conventional mortise cylinders.
- Locksets comply with UL10B - neutral pressure and UL10C/UBC 7-2 - positive pressure testing requirements. All locks shall be UL listed for 3 hour fire door.
- Lock case shall be non-handed, reversible without opening the lock case, and shall be manufactured of zinc dichromate plated steel. Lock case shall be interchangeable for knob or lever applications without modifying the chassis, and shall be constructed with a screw configuration that limits access to operating parts.
- Latchbolt shall be 2-piece anti-friction type manufactured from stainless steel, with a standard 2 3/4" backset, a full 3/4" throw and be field reversible. Deadbolt shall have 1" throw and shall be constructed of stainless steel, incorporating two 3/16" diameter security roller pins.
- All trim shall be cast, forged, or wrought and through-bolted with thread patch coated screws. Lever trim to have individual heavy duty springs for lever return, and independent rotation in both directions. Return to door style levers meets the 1/2" California State Fire Marshall requirement.
- Spindles to be independent, designed to 'break-away' at a maximum of 480 in./lbs. to prevent damage to the lock chassis.
- Provide standard non-handed curved lip strikes.
- Cylinders to be secured by a dual retainer.
- Acceptable manufacturer: FALCON Lock

# MA Series INTERCHANGEABLE CORE CYLINDERS

## Mortise Cylinders — Interchangeable Cores

All Falcon MA Series keyed locks are available with mortise cylinders that will accept Falcon small format interchangeable cores (SFIC) as well as some other manufacturers' SFIC. Interchangeable core cylinders are available in 6- or 7-pin configurations, for increased security by quick change of keying.

Interchangeable core cylinders allow the capability of immediately changing the keying on any door without the necessity of disassembling the lock. The core is removed by use of a special "control" key. Rotating the key to the right and gently pulling will disengage the core from the housing. The replacement core is then inserted and the control key rotated to the left to "lock" the core in place and the control key is removed.

To order: Falcon mortise locks with interchangeable cores, add "G" 6- or 7-pin in detail area of order.

To order: Falcon mortise locks for interchangeable core, less core (SFIC), add "B" 6- or 7-pin in detail area of order.

**Mortise Cylinders - Standard**

Only the finest materials are used in the manufacture of our cylinders. Modern equipment and gauging ensure consistent, reliable production of our entire line of cylinders. We offer a full and complete line of spacer rings, cylinder guards and spring washers, as well as numerous cams to fulfill the requirements of most applications. Standard mortise cylinders are furnished as 5- or 6-pin as standard. 7-pin cylinders are available. All keyed cylinders are supplied with two nickel silver keys.

**Cylinder Guards\***

Falcon offers two different types of cylinder guards in various thicknesses to work with sectional or escutcheon trim, different door ranges and various cylinder lengths. Our standard cylinder, 985, is 1-1/8" long. The factory will furnish the correct cam(s) and cylinder guard for the function and door thickness specified. The A08790 and A08794 cylinder guards in bar stock brass are available to accommodate different cylinder lengths and door thicknesses as shown.

## Construction Keying

Falcon offers two different construction key systems depending on the size of and application within the project. Both systems permit the installation and use of regular door locks during construction, yet completely preserve the security of the keying system for the ultimate building owner. The Master, Grand Master and change keys are never with the locks during the construction phase of a building. Only the “construction” keys are sent to the job site. Where the job permits, we will utilize the “Lost Pin System” as our standard system for construction keying. Larger or more complicated jobs may require the use of our “Blockokey® System” for construction keying.

### “Disposable Construction” Interchangeable Cores

This newly designed disposable construction core (1408) is an inexpensive alternative to interior keyed construction cores. This core should be used on interior door applications or where security on a site is not a concern. No keys need to be issued. The disposable core is inserted in the lever or knob and is operated by a thumb turn, which retracts the latch bolt. Please use either brass or permanent construction cores on exterior doors or secured areas.

### Locks with “Lost Pin System”

Our “lost” pin construction key system consists of one construction pin and a shallow hole in the side of the plug.

#### Construction Key—KB566

When the “construction” key is used, the construction pin is always in the cylinder plug, sitting on top of the bottom pin.

#### Master Key—KB578

When the Master key is inserted, the construction pin is pushed up into the cylinder housing. As the Master key is rotated to the right, the construction pin will drop into the hole in the plug, thereby eliminating any future use of the construction key.

### Locks with Blockokey® Cylinders

All lock cylinders on a specific project are operable by a special “project key.” Duplicates of this key may be assigned by the building contractor to workmen and subcontractors as required. No regular change keys or Master keys are needed on the job. This eliminates the possibility of subsequent exposure from lost or stolen keys.

#### How to order locks with Blockokey® Cylinders

Blockokey® locksets are ordered by adding the word “Blockokey” after the balance of the ordering information.  
EXAMPLE: 72 Each B511 D 626 1AA-72AA (Blockokey)

### Locks with Blockokey® Cylinders

#### Project Key—KB531

Lock cylinder is operated by the special “project key.” The last two pins in the cylinder are held inoperative by the key block.

#### Removal Tool—KB536

The special “project key” is canceled out by removal of the key block. A key block removal tool is furnished with the Master keys for the locks. Simply push the removal tool into the keyway, then withdraw it to remove the block. Thereafter, the “project key” will no longer operate the lock cylinder.

#### Change or Master Key—KB578

Cylinder is now only operable by the regular change key or Master key.

## How to Order

For correct ordering, and to ensure no delays in shipment of your order, the following descriptive data must be listed in the sequence shown. Necessary information can be found in other parts of this catalog. The example below shows an order for 16 each MA locksets in the 521 Entry function, DG (Dane-Gala) trim design in a 626 (satin chrome) finish, 8 RH (right hand) and 8 LH (left hand) to accommodate doors 1-3/4" thick with AA1-AA16 keying.

**Quantity:** Indicate the quantity required.

**Catalog Number:** Select catalog number.

**Trim Design:** Indicate letter of knob or lever design followed by letter of rose or escutcheon design.

**Example:** DG-D for Dane lever followed by G for Gala rose.

**Finish:** When the finish is the same for the outside and inside trim, it is shown once (626). For split finishes, the outside is designated first, then the inside (626 x 625).

**Latch:** Two-piece mechanical anti-friction standard. All catalog numbers shown in this catalog indicate 2-3/4" backset.

**Strike:** 4-7/8" x 1-1/4" x 1-5/16" lip-to-center with curved lip standard. Optional strikes with shorter or longer lip lengths available.

**Cylinder Type:** For 6-pin, add 6-pin. For 7-pin, add 7-pin.

**Door Hand:** See chart .

**Keying Detail:** We suggest using the standard terms developed by the A.H.C. (Consult Factory).

**Example:** AA1 - Grand Master keyed, Master keyed, change key 1.

**Interchangeable Core:** To order product capable of accepting an interchangeable core, add "B" less SFIC ( for interchangeable core). To order product with an interchangeable core, add "SFIC" (with interchangeable core). ex: "G" with Falcon SFIC core.

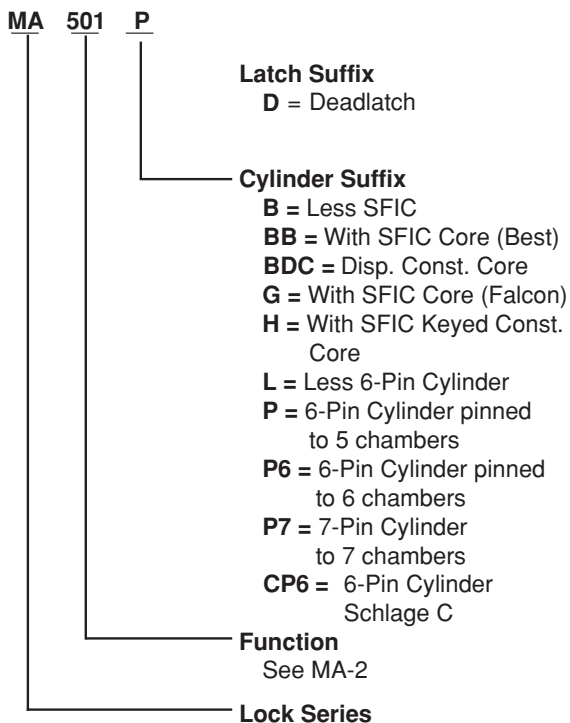

**Keyway:** "G" is standard on regular cylinders, "A" is standard on interchangeable cores. Other keyways available. See price book.

**Additional Keys:** Note the total number of keys required.

**Large Bow Keys:** Add - "with large bow keys."

## Finishes

Falcon offers several finish choices to compliment the design elements of most any project. Falcon applies the best available protective plating or coating to the surface of our products to minimize the exposure to weather, pollution, perspiration, extremes of climate, frequency of use and other factors. Please

consult with us if your building is subjected to chemical or corrosive conditions, as some finishes would not be recommended for these areas. Falcon recommends chrome plated or stainless steel finishes for high corrosive environments.

# 90 Series Surface Overhead Door Holders/Stops

## 90 Series Heavy-Duty

Glynn-Johnson 90 series holders and stops are the most rugged models available for heavy-duty applications. The channel is surface-mounted to the door, most often with six bolts, and the jamb bracket is surface mounted to the jamb, requiring minimal door and frame preparation.

These versatile units can be used in conjunction with most surface-applied door closers. The provided templates allow for variable mounting positions, ranging from 85° to 110° Hold-Open/Stop angle. These templates are designed for installation in almost all types of doors, including doors with conventional butt-type hinges or specialty hinges.

### Four Models:

- 90H Series Hold-Open Model
- 90S Series Stop-Only Model
- 90F Series Friction Hold-Open Model
- 90SE Series Special Stop-Only Model

### Five Sizes:

- Simple
- Standardized
- Each model is available in five sizes

### Three Options:

- J—Angle Jamb Bracket
- SHIM—Blade Stop Shim Kits
- SOC—Pin-in-Socket Security Screw Package

### Unmatched Convenience:

- Non-Handed
- Improved Compatibility with Door Closers
- Single-Acting Doors
- Interior/Exterior Applications
- Durable
- Easy to Install
- Improved Corrosion Resistance
- Function Conversion Kits Available

### Materials and Finishes:

In 300 series Stainless Steel, Brass and Steel substrates, these models are available in the largest selection of finishes in the industry. Stainless Steel models offer the highest resistance to corrosion. Available in the following finishes:

<b>Finish</b>	<b>Description</b>
US3	Polished Brass
US4	Satin Brass
US10	Satin Bronze
US10B	Oil Rubbed Bronze
US32	Polished Stainless Steel
US32D	Satin Stainless Steel

## Models

Glynn-Johnson 90 series door holders and stops provide long-lasting protection for doors, frames and hardware. All models incorporate a heavy-duty channel/slide-arm design and offset jamb bracket. This unique design allows for simple field modification of functions, should user requirements change.

### 90H Series Hold-Open

(Suffix H) Hold-Open models provide a convenient method of holding the door open at a predetermined position for short or long periods of time, permitting an unobstructed traffic flow through the opening. The Hold-Open function can easily be turned on or off by simply rotating the serrated knob on the bottom of the channel. This knob engages the Hold-Open mechanism, allowing the door to be held open at a predetermined position ranging from 85° to 110°. When the knob is flipped over, it acts as a stop and shock absorber.

The tension on the Hold-Open mechanism can be adjusted using a phillips screwdriver to offset air currents or other exterior conditions. The Hold-Open tension adjustment is located on the top of the slider in the channel.

### 90S Series Stop-Only

(Suffix S) When the Hold-Open function is not a requirement, Stop-Only models provide a reliable method of door control. Stop-Only models provide the same shock-absorbing capability as Hold-Open models. The Stop-Only model may be used on fire doors.

### 90F Series Friction Hold-Open

(Suffix F) Friction Hold-Open models are ideal for patient room doors, wardrobe and closet doors or similar applications where multiple Hold-Open positions are desired. The friction tension can be adjusted through the top of the channel using an allen wrench. The friction tension adjustment is located on the top of the slider in the channel.

## 90SE Series Special Stop-Only

(Suffix SE) When Stop-Only models are used in conjunction with single-point, Hold-Only electronic door closers, the Stop-Only function may be ordered without the shock-absorbing mechanism. Used as an auxiliary stop, these models prolong the life of the closer. The stop location is adjusted using an allen wrench on the stop block located in the channel.

*Note: Caution should be taken when using this option in other applications, as the elimination of the shock-absorbing spring can put added stress on the door and frame.*

## Application Information

### UL Classification

The 90 series Stop-Only models are classified by Underwriters Laboratories (UL) as Miscellaneous Fire Door Accessories. This classification applies to use on either Hollow Metal Fire Doors or Wood Fire Doors. These units may be used on doors of any rating. As a reminder, the Miscellaneous Fire Door Accessories (GVUX) section is defined by UL as: "Miscellaneous fire door accessories are intended in the individual Listings. The accessories have been investigated to determine that when installed in accordance with the manufacturer's instructions, the accessories do not adversely affect the fire rating of the fire door and/or fire door frames."

### Dead-Stop Templating:

Dead-stop templating is recommended for applications where a wall or similar obstruction is placed at an opening angle of 110° or less (i.e., doors that open back-to-back). Dead-stop templating can be applied to Hold-Open, Stop-Only and Friction models. The Dead-Stop position is the point at which the shock-absorbing spring is fully compressed. Therefore, when Dead-Stop Templating is used, the initial degree of opening will be 5° to 7° less than the Dead-Stop opening.

*Example: If the holder is templated to a 100° Dead Stop, the door will hold open at an angle between 93° and 95° but no further than 100°*

*Note: Do not use dead-stop templating on the 90SE Series since there is no shock-absorbing spring.*

### Environmental Considerations:

Environmental factors should always be considered when specifying overhead holders and stops. Doors that are positioned on a building's exterior or subject to corrosive conditions should be equipped with a holder constructed primarily of stainless steel or brass materials. For interior applications, steel is acceptable, though brass substrates generally provide a more attractive architectural-grade finish.

### Function Conversion Kits

- FK90H—Converts a 90F or a 90S unit into a 90H unit. To order specify FK90H.
- FK90F—Converts a 90H or a 90S unit into a 90F unit. To order specify FK90F.
- FK90SE—Converts a 90H, 90F or a 90S unit into a 90SE unit. To order specify FK90SE—Finish.
- No kit is needed to convert a 90H or 90F unit into a 90S unit.

## Options

### Suffix J (Angle Jamb Bracket):

An angle jamb bracket is available for converting standard models to hinge-side or flush transom mounting. The angle jamb bracket affixes to the standard jamb bracket. If ordered with the unit add suffix J. If needed separately order 90J by finish needed.

### Suffix SOC (Pin-in-Socket Security Screws):

A screw package with pin-in-socket screws for mounting the door bracket and the jamb bracket is provided instead of the standard screw package.

### Suffix SHIM (Blade Stop Shims):

Shim kits are available in 3 sizes  
90 SHIM1 is a 1/4" Shim Kit  
90 SHIM2 is a 1/2" Shim Kit  
90 SHIM3 is a 3/4" Shim Kit

If ordered with overhead, add suffix SHIM (1, 2 or 3). If needed separately order 90 SHIM (1, 2 or 3)—Finish.

# 450 Series Surface Overhead Door Holders/Stops

## 450 Series Medium-Duty

Glynn-Johnson provides the most complete line of overhead holders and stops, offering solutions for the most demanding door control problems. These surface-mounted holders and stops offer the widest variety of functions, materials and finishes to fit all medium- to light-duty applications.

Glynn-Johnson 450 series holders and stops provide reliable and versatile surface-mounted overhead door control for all medium to light-duty applications. The visible components are available in a wide variety of architectural finishes to complement any design. The 450 series holders and stops are designed for installation in virtually all types of doors and frames including doors with conventional butt hinges, offset pivots, continuous hinges, swing clear hinges and many other specialty hinges. The templates provided allow for variable mounting positions, ranging from 85° - 110° of opening.

## Models

Glynn-Johnson 450 series holders and stops are designed for medium to light-duty applications. They're ideal for openings that are subject to normal activity, providing protection for the door, frame, hinges and surrounding walls or obstructions.

Designed for improved compatibility with most door closers, all models incorporate popular channel/slide arm design and offset jamb brackets. The improved design makes it easier to change functions in the field, should user requirements change.

### 450H Series Hold-Open

(Suffix H) These models conveniently hold doors open at a predetermined position, permitting unobstructed traffic flow.

These models feature an adjustable automatic Hold-Open that is activated when the door is opened to a preset angle. The Hold-Open tension can be adjusted using an allen wrench through the end of the slider located in the channel at the top of the door. Each meets the 250,000 test cycles required for Grade 1 classification.

### 450S Series Stop-Only

(Suffix S) When the Hold-Open function is not required, the Stop-Only function provides the same effective door control without keeping the door held open. The Stop-Only model may be used on fire doors.

### 450F Series Friction Hold-Open

(Suffix F) Friction Hold-Open models provide an alternative holding method ideal for patient room doors, wardrobe or closet doors, or similar applications where multiple Hold-Open positions are desired. The friction tension can be adjusted using an allen wrench on the slider located in the channel at the top of the door.

## 450SE Series Special Stop-Only

(Suffix SE) When Stop-Only models are used in conjunction with single point Hold-Open electronic door closers, the function may be ordered without the shock absorbing mechanism. Used as an auxiliary stop with these closers, they will prolong the life of the closer. The stop location is adjusted using an allen wrench on the stop block located in the channel.

*Note: Caution should be taken when using this option in other applications, as the elimination of the shock-absorbing spring can put added stress on the door and frame.*

## Application Information

### Closer Applications

Glynn-Johnson 450 series models require minimal door and frame preparation. They may be used in conjunction with most surface-applied door closers. In some cases, optional drop brackets may need to be mounted on the closers. These brackets are available from the closer manufacturer.

### UL Classification

The 450 series Stop-Only models are classified by Underwriters Laboratories (UL) as Miscellaneous Fire Door Accessories. This classification applies to use on either Hollow Metal Fire Doors or Wood Fire Doors. These units may be used on doors of any rating. As a reminder, the Miscellaneous Fire Door Accessories (GVUX) section is defined by UL as: "Miscellaneous fire door accessories are intended in the individual Listings. The accessories have been investigated to determine that when installed in accordance with the manufacturer's instructions, the accessories do not adversely affect the fire rating of the fire door and/or fire door frames."

### Dead-Stop Templating:

For situations where a wall or similar obstruction is in place at an opening angle of 110° or less (e.g. doors that open back-to-back), dead stop templating should be used. This includes all Hold-Open, Friction and Stop-Only models, except when the "SE" option is used. The Dead Stop position is reached when the shock-absorbing spring is fully compressed, allowing an initial degree of opening of 5° to 7° less than the Dead Stop opening.

*Example: If the holder is templated for 100° Dead Stop, the door will hold open somewhere between 93° to 95°, and no further than 100°.*

*Note: Do not use dead-stop templating on the 450SE Series since there is no shock-absorbing spring.*

### Environmental Conditions:

To assure a long operating life for holders and stops, consider the environment where they will be used. Doors that open to the exterior of a building or are subject to corrosive conditions should have a holder constructed primarily of stainless steel, brass or bronze materials. For interior doors, steel material may be acceptable, although brass and bronze substrates will provide a more attractive architectural grade finish.

### Heavy-Use Applications:

Where doors and frames are subject to heavy use and abuse, a heavy-duty holder or stop should be considered. Also heavy-duty units should be considered on exterior doors subject to wind.

## Options

### Suffix J (Angle Jamb Bracket):

An additional option on the 450 Series is the Angle Jamb Bracket for hinge-side or flush transom mounting. The angle jamb bracket affixes to the standard jamb bracket. If ordered with the overhead add suffix J. If needed separately order 450J-Finish.

### Suffix SHIM (Blade Stop Shims):

Shim kits are available in 3 sizes:  
450 SHIM1 is a 3/16" Shim Kit  
450 SHIM2 is a 3/8" Shim Kit  
450 SHIM3 is a 9/16" Shim Kit

If ordered with overhead, add suffix SHIM (1, 2 or 3). If needed separately order 450SHIM (1, 2 or 3)-Finish.

### Suffix SOC (Pin-in-Socket Security Screw Package):

A screw package with pin-in-socket screws for mounting the channel to the door and the jamb bracket to the frame is provided instead of the standard screw package.

# Coordinators - Bar Coordinators and Filler Bars

## COR Series Bar Coordinators

- The COR Series Coordinators are designed for use on pairs of doors when one door needs to close before the other.
- All COR units function easily. The active door lever, located nearest to the active stop, holds the active door open until the trigger mechanism is released by the closing of the inactive leaf.
- All COR units are equipped with an override feature which allows the active door to close under extreme pressure.
- All COR units are compatible with Flush Bolts.
- The COR Series is available in five sizes for variable door opening widths.
- The COR Series does not cover the entire length of the stop, so a filler bar can be provided to maintain architecturally clean lines.
- COR Series Coordinator Channels and fillers are made of aluminum and are normally furnished in a US28 finish. Also available in US26D, and 315AN (Black).
- Meets ANSI/BHMA A156.3, Type 21A.
- UL Listed for installation on labeled frame.
- Optional Filler Bars: FL20, FL32 and FL44, available to maintain clean line.
- Optional Mounting Brackets available: MB1, MB2, MB1F, MB2F, MB3F, MB1V, MB2V, and MB3V for other stop applied hardware.

**Dimensions:** 1-5/8" Wide x 5/8" Deep x Ordered Length

### For Openings Where Doors Are Same Size

Coordinator Number	Length of Channel	For Opening Widths	Common Applications
COR32	32"	34" - 52"	Pair of 2'0" Doors
COR42	42"	52" - 72"	Pair of 2'6" Doors
COR52	52"	62" - 92"	Pair of 3'0" Doors
COR60	60"	70" - 108"	Pair of 3'6" Doors
COR72	72"	84" - 132"	Pair of 4'0" Doors

### For Openings Where Doors Are Unequal Size

The coordinator length should equal the active door width plus approximately 1/2 the inactive door width. The coordinator must be 6" longer than the active door width and shorter than the overall frame opening between stops.

## FL Series Filler Bars

- The FL Filler Bars are available in three sizes for variable frame openings.
- FL Filler Bars are made of aluminum and are normally furnished in a US28 finish. Also available in US26D and 315AN (Black).
- FL Filler Bars are field sized to frame opening.

Filler Bar Number	Length
FL20	20"
FL32	32"
FL44	44"

# Coordinators - Mounting Brackets

## Mounting Brackets

### MB1 and MB2

- Allows stop mounted hardware to be properly installed without damaging the COR coordinator, such as a parallel arm closer or a non-fire-rated surface vertical rod strike.
- Stop mounted hardware will need to be lowered to compensate for the height of the coordinator and mounting bracket.
- MB mounting brackets are made of aluminum and normally furnished in a USP finish. Powder Coated Finishes: SP28 and SPBLK.

MB1

MB2

Product	Jamb Depth	Stop Width
MB1	4-3/4" Min.	Over 2-1/2"
MB2	4-3/4" Min.	Up to 2-1/2"

#### Dimensions:

MB1: 4" Wide x 3" Deep x 15/16" Tall

MB2: 4" Wide x 3-1/4" Deep x 1-5/8" Tall

### MB1F, MB2F and MB3F

- Allows stop mounted hardware to be properly installed without damaging the COR coordinator. Example: strike for fire-rated surface vertical rod exit device.
- Stop mounted hardware will need to be lowered to compensate for the height of the coordinator and mounting bracket.
- MBF mounting brackets are made of 3/8" thick steel and normally furnished in a USP finish. Powder Coated Finishes: SP28 and SPBLK.

MB1F

MB2F

MB3F

Product	Jamb Depth	Stop Width
MB1F	5" Min.	1-1/2" to 2-1/4"
MB2F	5-7/8" Min.	2-3/8" to 3-1/4"
MB3F	6-7/8" Min.	3-3/8" and Wider

#### Dimensions:

MB1F: 4" Wide x 3" Deep x 1-5/8" Tall

MB2F: 4" Wide x 4" Deep x 1-5/8" Tall

MB3F: 4" Wide x 3-1/2" Deep x 1" Tall

## Special Factory Preparation for Use with Vertical Rod Exit Devices

- Coordinators may need to be prepared at the factory for use with some surface and concealed vertical rod exit devices. (See Chart below)
- If exit device not listed in chart, the information shown on the illustration will be needed.

1. Exit Device Manufacturer and Model No.
2. Active Net Door Size, "X"
3. Inactive Net Door Size, "Y"
4. Exit Device Backset, "U"
5. Stop Width, "W"
6. Stop Thickness if other than 5/8", "V"

# Ordering Guide for Bar Coordinators

## How to Order COR and Accessories

**COR 52 - US28 - FL20 - D - 36" - 2-MB2**

**COR Size:**  
32, 42, 52, 60, 72

**Finishes:**  
US28, US26D, 315AN (Black)

**Filler Bar (if desired):**  
FL20, FL32, FL44

**Vertical Rod Exit Device Cutout Type (if applicable):**  
A, B, C, D, E, F, G  
If other Vertical Rod Exit Device not listed on chart, from page A14, include information as shown on page A14.

**Net Active Door Size** – Required for ALL Vertical Rod Exit Device Applications

**Mounting Bracket:**  
Indicate quantity, then bracket. MB1, MB2, MB1F, MB2F, MB3F, MB1V, MB2V, MB3V  
Mounting brackets are sold and packaged separately from coordinators.

### To determine the size COR you need:

1. Start with the active door size (X).
2. Next consider the overall frame opening between stops (F).
3. Preferably, the coordinator would equal the active door width (X) + approximately 1/2 inactive door width (Y). Keep in mind the coordinator must be 6" longer than the active door width (X) and less than the overall frame opening between stop (F).

### Examples:

- Pair of 30" Doors, 5/8" Stops  
Active Door Size, X = 30"  
Overall Frame Opening between Stops, F = 58-3/4"  
Recommended Coordinator: COR42
- 36" Active Door, 18" Inactive door, 5/8" Stops  
Active Door Size, X = 36"  
Overall Frame Opening between Stops, F = 52-3/4"  
Recommended Coordinator: COR42
- Pair of 36" Doors, 5/8" Stops  
Active Door Size, X = 36"  
Overall Frame Opening between Stops, F = 70-3/4"  
Recommended Coordinator: COR52
- 48" Active Door, 24" Inactive Door, 5/8" Stops  
Active Door Size, X = 48"  
Overall Frame Opening between Stops, F = 94-3/4"  
Recommended Coordinator: COR60

## 8200 Series Push Plates and 8300 Series Pull Plates

- Made from the finest architectural aluminum, brass, and stainless steel.
- For Push Plate sizes other than listed, contact our Customer Service Department or your local sales representative.
- All aluminum, brass, and stainless steel Push Plates meet ANSI A156.6 requirements for .050" thickness.
- Each Push Plate is packaged individually wrapped with mounting screws.
- For special mounting methods other than standard, see pages C11 - C13.

### Push and Pull Plates Cut for Cylinder or Thumbturns

- All plates may be ordered with cutout for cylinder or thumbturn. Standard cutouts are positioned 2" from top of plate and centered on plates up to 4" wide or 2" from edge on plates over 4" wide. Specify hand of door when ordering cutout for plates wider than 4". On pull plates, if the pulls center-to-center dimension interferes with the cutout for the cylinder or thumbturn, please provide drawing of cutout location when ordering.
- Standard size for cylinder cutouts is 1-1/4" diameter and for thumbturn cutout is 3/8" diameter.
- When ordering, add suffix CFC for cut for cylinder, and CFT for cut for thumbturn to product number.

## Series 8400 Door Protection Plates

.050" Thickness

### Features:

- Door Protection Plates are fabricated from the finest architectural aluminum, brass, and stainless steel, or 1/8" thick clear acrylic plastic or black or brown high impact polyethylene.
- All aluminum, brass, bronze and stainless steel Door Protection Plates meet ANSI A156.6 requirements for .050" thickness.
- Optional Beveling—For beveling of top and two sides of plates suffix with B3E, and for beveling of four sides suffix with B4E. Plastic plates are beveled on all four sides as standard.
- Each plate is packaged carefully wrapped in strong kraft paper with #6 x 5/8" oval head, undercut sheet metal screws plated to match, for easy installation on hollow metal, laminate, or wood doors. All plates are packaged in heavy duty corrugated cardboard; larger plates are enclosed in a wooden frame.

- Use No. 8401 Kickplate Gasket Tape as a buffer between brass kickplates and metal doors to help prevent tarnishing which may result from electrolytic oxidation. One package provides enough double-sided adhesive-backed foam tape for the perimeter of an 8" x 34" plate.
- Finishes:  
Brass: B3, B4, B5, B10, B10B (for heights over 24", check with customer service)

## New 4040XP

The new 4040XP is LCN's most durable heavy duty closer designed for the most demanding, high use and abuse applications.

- ▶ 44% increased bearing load capacity
- ▶ Strongest pinion ever- at 3/4" journal diameter
- ▶ Widest bearing ever- at 5/8"
- ▶ Stronger pinion teeth
- ▶ New V-shield™ seal with 20% longer life
- ▶ XP = eXtra Protection in real world applications
- ▶ Cast Iron
- ▶ Forged Steel Arm
- ▶ Double Heat Treated Steel Pinion
- ▶ All Weather Fluid
- ▶ Non-Handed
- ▶ LCN® Fast™ Power Adjust
- ▶ Fast & Accurate Installation
- ▶ UL & cUL Listed
- ▶ Tested and certified under ANSI Standard A156.4, grade one

- ▶ **NEW 4040XP** closer shipped with **EDA arm**, standard plastic cover, and self reaming and tapping screws.
- ▶ Non-sized cylinder is adjustable for interior doors to 5'0" and exterior doors to 4'0".
- ▶ Closer mounts parallel arm (EDA arm) on either right or left swinging doors.
- ▶ Optional hinge side and top jamb mount with optional regular arm.
- ▶ Closers to meet ADA requirements. See 4040XP Series page 49.
- ▶ Standard or optional custom powder coat finish.
- ▶ Optional plated finish on metal cover, arm and fasteners.
- ▶ Optional SRI primer for installations in corrosive conditions is available with powder coat only.
- ▶ Optional designer series metal cover
- ▶ UL and cUL listed for self-closing doors without hold-open.
- ▶ 4040XP can be used with all 4041 accessories. See pages 45-47 for options.

## HINGE (PULL) SIDE MOUNTING

### MAXIMUM OPENING

Templating allows up to 120°.

Hold-open points 90° up to 120° with hold-open arm.

### Optional, Non-handed Designer Series Metal Cover

### Options

- ▶ 4040XP cylinder
- ▶ 4041 Delayed action cylinder.
- ▶ Hold-open arm.
- ▶ Metal or lead lined cover.
- ▶ Corner bracket.
- ▶ Designer Series metal cover.

### Special Templates

Customized installation templates or products may be available to solve unusual applications. Contact LCN for assistance.

- ▶ **Butt Hinges** should not exceed 5" (127 mm) in width.
- ▶ **Auxiliary Stop** is recommended at hold-open point or where a door cannot swing beyond 120°.
- ▶ **Reveal** should not exceed 3/4" (19 mm) for regular arm or hold-open arm.
- ▶ **Top Rail** less than 3 3/4" (95 mm) requires PLATE, 4040-18. Plate requires 2" (51 mm) minimum. With Designer Series metal cover, use PLATE, 4040-18DS1
- ▶ **Clearance** of 2 3/8" (60 mm) behind door required for 90° installation. 2 7/8" (73 mm) for Designer Series metal covers
- ▶ **Delayed Action** (not available on 4040XP) Add suffix "DEL" to selected cylinder (eg. 4041 DEL). Delays closing from 120° to 70°. Delay time adjustable up to approximately 1 minute.
- ▶ **Bull Nose Trim** requires SOFFIT SHOE, 4040-65.
- ▶ **Corner Bracket** available for doors where top jamb or parallel arm mounting can not be used. 4040-16 allows 110° opening. Projects 5" (127 mm) from stop, 12 13/16" (325 mm) from frame. 4040-17 allows 100° opening with certain auxiliary door holders (consult factory). Projects 6 3/8" (162 mm) from stop, 13 11/16" (348 mm) from frame.

## TOP JAMB (PUSH SIDE) MOUNTING

### MAXIMUM OPENING

Templating allows up to 120°.

Hold-open points 85° up to 120° with hold-open arm.

### Optional, Non-handed Designer Series Metal Cover

- ▶ **Butt Hinges** should not exceed 5" (127 mm) in width.
- ▶ **Auxiliary Stop** is recommended at hold-open point or where the door cannot swing 120°.
- ▶ **Reveal** of 2 9/16" (65 mm) allows 120° opening for REGULAR ARM or standard HOLD-OPEN ARM. 4 13/16" (122 mm) allows up to 120° opening with LONG ARM where standard rod and shoe is replaced with optional LONG ROD AND SHOE 4040-79LR. Use H-LONG ARM with LONG HEAD AND TUBE, 4040-78HL for hold-open. 8" (203 mm) allows up to 120° opening with EXTRA LONG ARM where standard rod and shoe is replaced with optional EXTRA LONG ROD AND SHOE, 4040-79ELR.
- ▶ **Top Rail** requires 1 1/4" (32 mm) minimum.  
2 1/4" (57 mm) minimum with closer on PLATE, 4040-18TJ.  
3" (76 mm) minimum with closer on PLATE, 4040-18G. With Designer Series metal cover, use PLATE, 4040-18TJDS1
- ▶ **Head Frame** less than 3 1/2" (89 mm) requires PLATE, 4040-18TJ. With flush ceiling, use PLATE, 4040-18G. Either plate requires 1 3/4" (44 mm) minimum.
- ▶ **Delayed Action** (not available on 4040XP) Add suffix "DEL" to selected cylinder (eg. 4041 DEL). Delays closing from 120° to 80°. Delay time adjustable up to approximately 1 minute.

### Options

- ▶ 4040XP cylinder
- ▶ 4041 Delayed action cylinder.
- ▶ Long arm, extra long arm, hold-open arm, long hold-open arm.
- ▶ Metal or lead lined cover.
- ▶ Designer Series metal cover.

Optional non-handed plastic clip-on cover.

### DESIGNER SERIES METAL COVER, 4040-72DS1

Optional, non-handed designer series metal cover.

## ARMS

### REGULAR ARM, 4040-3077

Non-handed arm mounts pull side or top jamb with shallow reveal. P4041 closer includes PA SHOE, 4040-62PA required for parallel arm mounting.

### PA SHOE, 4040-62PA

Required for parallel arm mounting.

### LONG ARM, 4040-3077L

Optional non-handed arm includes LONG ROD AND SHOE, 4040-79LR for top jamb mount.

### EXTRA LONG ARM, 4040-3077ELR

Optional non-handed arm includes EXTRA LONG ROD AND SHOE, 4040-79ELR for top jamb mount with deep reveal.

### HOLD-OPEN ARM, 4040-3049

Optional, non-handed arm mounts pull side or top jamb with shallow reveal, hold-open adjustable shoe. P4041 closer includes 4040-62PA shoe required for parallel arm mounting.

### LONG HOLD-OPEN ARM, 4040-3049L

Optional non-handed arm includes LONG HEAD AND TUBE, 4040-3048L for top jamb mount.

### EXTRA DUTY ARM, 4040-3077EDA

Non-handed parallel arm features forged, solid steel main and forearm for potentially abusive installations.

### HOLD-OPEN EXTRA DUTY ARM, 4040-3049EDA

Optional handed arm provides hold-open function, adjustable at the shoe.

### THICK HUB SHOE, 4040-62G

Optional for blade stop clearance, requires special templating.

### FLUSH TRANSOM SHOE, 4040-145

Optional for single rabbetted installations, requires special templating.

## ARMS cont.

### CUSH-N-STOP® ARM, 4040-3077CNS

Optional, non-handed parallel arm features solid forged steel main arm and forearm with stop in soffit shoe.

### HCUSH ARM, 4040-3049CNS

Provides hold-open function with templated stop/hold-open points. Handle controls hold-open function.

### SPRING CUSH ARM, 4040-3077SCNS

Optional, non-handed parallel arm for abusive applications features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe.

### SPRING HCUSH ARM, 4040-3049SCNS

Optional, non-handed parallel arm for abusive applications features solid forged steel main arm and forearm with spring loaded stop in the soffit shoe. Handle controls hold-open function.

## INSTALLATION ACCESSORIES

### PLATE, 4040-18/4040-18DS1

Required for hinge side mount where top rail is less than 3 3/4" (95 mm). Plate requires minimum 2" (51 mm) minimum top rail. With Designer Series metal cover, use PLATE, 4040-18DS1

### PLATE, 4040-18G

Locates top jamb mounted closer flush with top of head frame face in flush ceiling condition. Plate requires 1 3/4" (44 mm) minimum head frame.

### PLATE, 4040-18TJ/4040-18TJDS1

Centers top jamb mounted closer vertically on head frame where face is less than 3 1/2" (89 mm). Plate requires 1 3/4" (44 mm) minimum head frame. With Designer Series metal cover, use PLATE, 4040-18TJDS1

### PLATE, 4040-18PA/4040-18PADS1

Required for parallel arm mounting where top rail is less than 5 1/2" (140 mm), measured from the stop. Plate requires 2" (51 mm) minimum top rail. With Designer Series metal cover, use PLATE, 4040-18PADS1

## INSTALLATION ACCESSORIES cont.

### CORNER BRACKET, 4040-17

Designed to lower closer for clearance of certain auxiliary holders (consult factory).

### CORNER BRACKET, 4040-16

For doors where top jamb or parallel arm mounting cannot be used (consult factory).

**CUSH SHOE SUPPORT, 4040-30** provides anchorage for fifth screw used with CUSH arms, where reveal is less than 3 1/16" (78 mm).

**BLADE STOP SPACER, 4040-61** required to lower parallel arm shoe to clear 1/2" (13 mm) blade stop.

**SOFFIT SHOE, 4040-65** adapts hinge side shoe to rounded or bull nose trim.

**PA SHOE ADAPTER, 4040-418** provides horizontal mounting surface for parallel arm shoe on single rabbeted or flush frame.

**CUSH FLUSH PANEL ADAPTER, 4040-419** provides horizontal mounting surface for CUSH shoe on single rabbeted or flush frame.

**AUXILIARY SHOE, 4040-62A** requires a top rail of 7" (178 mm). Optional shoe replaces -62PA for parallel arm mounting of regular arm with overhead holder/stop.

# AD-300

## Networked Hardwired Electronic Lock

### Overview

AD-Series electronic locks from Schlage are designed to be modular and provide more options to choose from, more functionality in the lock and more compatibility with existing systems. Its patent-pending modular design allows the lock to be customized to fit the needs of an application now, and can change to meet future needs without removing it from the door.

Factory orderable options include choices of credential readers, chassis type, network configurations, locking functions, lever styles and finishes. It also offers a wide selection of features that can be configured in the field to customize your openings.

To simplify installation, the AD-Series combines all the hardware components required at the door for a complete access control system into one integrated design that includes the electrified lock, credential reader, request-to-exit and -enter sensors, door position switch, tamper switch and more.

The AD-300 has a number of features built in that are configurable in the field and a long list of items that can be monitored by access control software. Please consult your access control software partner for details on the integration of specific features.

### Features and Benefits

- Open Architecture platform
- Panel interface options ensure seamless communication with your system
- Real-time communication between access control system and lock
- Field configurable Fail Safe/Fail Secure and other capabilities per code
- Available in cylindrical, mortise, mortise with deadbolt and exit trim
- Compatible with major brands of master key systems
- A wide selection of credential readers and networking options to choose from
- AD-Series with multi-technology readers are NFC compatible
- ANSI/BHMA A156.25, ANSI/BHMA Grade 1, UL 294, UL10C, FCC Part 15, ADA, RoHS

## System Configuration

## Panel Interface Board (PIB300-2D)

If the system requires Wiegand or Clock & Data protocol (rather than a direct RS-485 connection), the AD-Series open architecture platform connects up to two AD-300 locks to the Panel Interface Board (PIB300 - sold separately, if required) that seamlessly connects to an access control panel or reader interface board. All monitoring is captured at the remote monitoring station.

#### Notes:

\*\* FIPS 201-1 Compliant Option Available: The AD-Series can be used in applications which require approval by the U.S. Federal Government under HSPD-12 for FIPS 201-1 Compliance. Specific components are required, please see the AD-401 data sheet or AD-301 data sheet for complete details.

† 75 bit output format default. Configurable to other output formats

**Benefits of AD-Series Multi-Technology Readers:**

- Reads multiple brands of both proximity (125 kHz) and smart (13.56 MHz) technologies with single device
- AD-Series multi-technology readers are NFC compatible
- Allows end user to migrate to more secure credentials over time and as budgets permit

**Additional Readers**

**Magnetic Stripe**

- Now available with choice of Insertion or Swipe style readers
- Triple Track Reader (1, 2 or 3), field configurable
- ABA, ISO76XX Standard
- Reader can be cleaned without removing lock from door
- Option for 12 button, 3x4 matrix backlit keypad

**Keypad**

- Backlit keypad
- 12 button, 3x4 matrix

## AD-300 Hardwired Electronic Lock

AD-Series electronic locks from Schlage are designed to be modular and provide more options to choose from, more functionality in the lock and more compatibility with existing systems. Its patent-pending modular design allows the lock to be customized to fit the needs of an application now, and can change to meet future needs without removing it from the door.

Factory orderable options include choices of credential readers, chassis type, network configurations, locking functions, lever styles and finishes. It also offers a wide selection of features that can be configured in the field to customize your openings.

To simplify installation, the AD-Series combines all the hardware components required at the door for a complete access control system into one integrated design that includes the electrified lock, credential reader, request-to-exit and -enter sensors, door position switch, tamper switch and more.

The AD-300 has a number of features built in that are configurable in the field and a long list of items that can be monitored by access control software.

### Features

- Open Architecture platform
- Panel interface options ensure seamless communication with your system
- Real-time communication between access control system and lock
- Field configurable Fail Safe/Fail Secure and other capabilities per code
- Available in cylindrical, mortise, mortise with deadbolt and exit trim
- Compatible with major brands of master key systems
- A wide selection of credential readers and networking options to choose from

## System Configuration

## Panel Interface Board (PIB300-2D)

If the system requires Wiegand or Clock & Data protocol (rather than a direct RS485 connection), the AD-Series open architecture platform connects up to two AD-300 locks to the Panel Interface Board (PIB300 - sold separately, if required) that seamlessly connects to an access control panel or reader interface board. All monitoring is captured at the remote monitoring station.

## Exit Trim Compatibility

The AD-Series Electronic Lock is available in 993 Exit Trim for use on openings that require exit devices for either retrofit or new construction applications. Offline and networked solutions are available.

The 993 Exit Trim was designed to suite with AD-Series cylindrical and mortise locksets to ensure that the facility remains aesthetically consistent.

The AD-Series 993 Exit Trim utilizes universal hardware to simplify installation of offline trim to a variety of exit devices, including Rim style from Von Duprin, Falcon, Sargent, Corbin Russwin, Dorma, and Yale.

### Available Exit Trim Styles:

- 993R – Rim or Concealed Vertical Rod (CVR for metal doors only)
- 993S – Surface Vertical Rod
- 993M – Mortise

## AD-300 Hardwired Electronic Lock

AD-Series electronic locks from Schlage are designed to be modular and provide more options to choose from, more functionality in the lock and more compatibility with existing systems. Its patent-pending modular design allows the lock to be customized to fit the needs of an application now, and can change to meet future needs without removing it from the door.

Factory orderable options include choices of credential readers, chassis type, network configurations, locking functions, lever styles and finishes. It also offers a wide selection of features that can be configured in the field to customize your openings.

To simplify installation, the AD-Series combines all the hardware components required at the door for a complete access control system into one integrated design that includes the electrified lock, credential reader, request-to-exit and -enter sensors, door position switch, tamper switch and more.

The AD-300 has a number of features built in that are configurable in the field and a long list of items that can be monitored by access control software.

### Features

- Open Architecture platform
- Panel interface options ensure seamless communication with your system
- Real-time communication between access control system and lock
- Field configurable Fail Safe/Fail Secure and other capabilities per code
- Available in cylindrical, mortise, mortise with deadbolt and exit trim
- Compatible with major brands of master key systems
- A wide selection of credential readers and networking options to choose from

## Functions

- ▶ Classroom/Storeroom
- ▶ Office
- ▶ Privacy
- ▶ Apartment

**Note:** Office function not available with Mortise Deadbolt option. To ensure safety all functions always allow for free egress.

## Standard Status Signals

- ▶ Lock/Unlock Status (Clutch Position)
- ▶ Request-to-Exit Switch
- ▶ Door Position Switch
- ▶ Mechanical Key Override
- ▶ Deadbolt Position
- ▶ Interior Cover Tamper Guard
- ▶ Communication Status
- ▶ Request-to-Enter

## System Configuration

## Panel Interface Board (PIB300-2D)

If the system requires Wiegand or Clock & Data protocol (rather than a direct RS485 connection), the AD-Series open architecture platform connects up to two AD-300 locks to the Panel Interface Board (PIB300 - sold separately, if required) that seamlessly connects to an access control panel or reader interface board. All monitoring is captured at the remote monitoring station.

## AD-Series Exit Trim Compatibility

The AD-Series Electronic Lock is available in 993 Exit Trim for use on openings that require exit devices for either retrofit or new construction applications. Offline and networked solutions are available.

The 993 Exit Trim was designed to suite with AD-Series cylindrical and mortise locksets to ensure that the facility remains aesthetically consistent.

The AD-Series 993 Exit Trim utilizes universal hardware to simplify installation of offline trim to a variety of exit devices, including Rim style from Von Duprin, Falcon, Sargent, Corbin Russwin, Dorma, and Yale.

### Available Exit Trim Styles:

## 2 amp Power Supply

### Overview

Schlage's comprehensive line of power supplies and option boards were designed to address the changing needs of the access control market.

Installation is simplified by utilizing a flat mounting design and polarized locking connectors for option boards. This new design eliminates the need for racks and side connectors. The flat mounting of the option boards also provides for easier access to the terminal blocks for connection of electrified devices (such as electrified strikes, electromagnetic locks, card readers, etc).

Common to the line of PS900 Series power supplies is a constant output rating at both 12v and 24v settings, universal 120 VAC to 240 VAC input, and polarized option board connectors. New fire alarm interface board mounting allows outputs to be configured as switched (power cut) or unswitched (power continues) when signal provided.

\* All PS900 Series of power supplies and option boards have been tested and certified to meet UL294.

### Features

- 2A @ 12/24 VDC output, field selectable with jumper
- Class 2 Rated power limited output
- Universal 120 -240 VAC input
- Low voltage DC, regulated and filtered
- Single polarized connector for distribution board
- Fused primary input
- AC input and DC output monitoring circuit w/ LED indicators
- Cover mounted AC input indication
- NEMA 1 enclosure
- Hinged cover w/ lock down screws
- High voltage protective cover

## OPTIONS

- Emergency Interface Relay (FA)
- Battery Backup
- 2 relay QEL panic device control board
- 4 relay distribution board
- 4 relay distribution board with logic
  - Field configurable for:
    - Time delay function
    - Auto operator
    - Security interlock
- 8 fused output distribution board
- 8 PTC output distribution board

### *Mercury Magnetic Stripe Readers*

#### Overview

The SMR10 Mercury Magnetic Stripe Reader has a slim, mullion style design. The die cast metal housing makes it ideal for indoor or outdoor applications.

The SMR20 Mercury Magnetic Stripe Reader has a slim, mullion style design. The die cast metal housing makes it ideal for indoor or outdoor applications. The keypad is a 12 position membrane style.

#### FEATURES & BENEFITS

- Rugged Metal Housing
- All stainless steel hardware is standard
- Audiovisual indication provides Two LED's (red/green) and beeper sounds
- Static Discharge Protection
- Accepts low or high coercivity-magnetic cards
- Standard Track 2 encoding (Track 1 & 3 are available)
- One security screw mounting
- Supports Wiegand or Clock & Data interface formats via Dip Switches

#### SPECIFICATIONS:

- Dimensions: 1.95"W x 1.3"H x 5.5"L
- Power requirements: 5 or 12 VDC
- Power consumption 20 mA at 12 VDC
- Operating temperature: -40F to 170F
- Weight: 10 oz.
- Cable distance: 500' with 18AWG 6 conductor stranded with overall shield

## PS914 4 amp Power Supply High Inrush model

### Overview

Von Duprin's power supply and option boards were designed to meet the specific requirements of electrified panic devices.

Installation is simplified by utilizing a flat mounting design and polarized locking connectors for option boards. This new design eliminates the need for racks and side connectors. The flat mounting of the option boards also provides for easier access to the terminal blocks for connection of electrified devices (such as electrified panic devices, strikes, card readers, etc).

Common to the line of PS900 Series power supplies is a constant output rating at both 12v and 24v settings, universal 120 VAC to 240 VAC input, and polarized option board connectors. New fire alarm interface board mounting allows outputs to be configured as switched (power cut) or unswitched (power continues) when signal provided.

\* All PS900 Series of power supplies and option boards have been tested and certified to meet UL294.

### Features

- 4A @ 12/24 VDC output, field selectable with jumper
- Designed with high inrush current for powering electrified panic devices
- Universal 120 -240 VAC input
- Low voltage DC, regulated and filtered
- Electronic power limiting foldback circuit for AC current overload protection
- Two polarized connectors for distribution boards
- Fused primary input
- AC status monitor - isolated SPDT contacts
- AC input and DC output LED status indicators
- Cover mounted AC input indication
- Hinged cover w/ lock down screws
- High voltage protective cover

## OPTIONS

- Fire Alarm Relay (FA)
  - *Must be installed on distribution boards*
- Battery Backup
- 2 relay EL panic device control board
- 2 relay QEL panic device control board
- 4 relay distribution board
- 4 relay distribution board with logic
  - Field configurable for:
    - Time delay function
    - Auto operator
    - Security interlock
- 8 fused output distribution board
- 8 PTC output distribution board

# VON DUPRIN® 98/99™ Rim Exit Device

299 Strike

98 and 99 rim exit devices for all types of single and double doors with mullion, UL listed for Panic Exit Hardware. Devices are ANSI A156.3 – 2001 Grade 1. The 98 device has a smooth mechanism case and the 99 device has a grooved case. The rim device is non-handed except when the following device options are used: SD (Special Dogging), -2 (Double Cylinder) or SS (Signal Switch). See Opposite page for available outside trim and device functions. Covers stock hollow metal doors with 86 or 161 cutouts on single doors (may cover cutouts on pairs – consult template).

The 98/99 devices are available in the following finishes: US3, US4, US10, US26, US26D, US28, 313AN, 315AN and US32D for the 98 device only. See page 52 for component finishes and the inside cover for finish chips.

# VON DUPRIN® Signal Switch RX and LX

**RX** (request to exit) signal switch feature is used to signal the use of an opening from the push side. When the push pad is depressed, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the touch bar. **See Low Current option for computer operated system applications.**

**RX2** (double request to exit) features 2 RX switches.

**LX** (latchbolt monitoring) signal switch monitors both egress and access of an opening. When the latchbolt is retracted, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the latchbolt position. **See Low Current option for computer operated system applications.**

**LC** (low current) option is available for RX and LX switches. **(Most commonly used in computer operated monitoring systems.)** The RX2 is not available in low current.

Signal Switches are available on 22, 33A, 35A, 55, 88, 98, 99 series devices. The low current version is not available with the 55 and 88 series devices.

The INPACT 94/95 series devices are only available with the LX switch option.

The device can be connected to a security console, or may be used as a single door alarm, when used with a horn and power supply. A continuous current electric transfer must be used for transferring the signal from the frame to the door.

Signal Switches can be used in combination with other electrical functions (EL, E).

- RX or RX2 may be combined with the E (electric unlocking) mortise lock device.
- For latchbolt monitoring on a mortise lock device, specify a SS7500 lock.
- LX and RX switches can be combined. Example: LX-RX99L.
- LX, RX or RX2 switches can be used in combination with EL (electric latch retraction) option.

RX, RX2 and LX switches are available for factory or field installation.

**RX and LX switches should not be used to control a load, but as a signaling switch.**

Rim device shown — Refer to 33A/35A or 98/99 series catalog for complete product information, mounting styles, outside trim, finishes, etc.

## To Order, Specify:

### For Factory Installed:

Prefix:	RX	Request to Exit
	RX2	Double Request to Exit
	LX	Latchbolt Monitoring
	LXRX	Latchbolt Monitoring/Request to Exit Combination
	RXLC	Low Current Request to Exit
	LXLC	Low Current Latchbolt Monitoring
	LXRLC	Low Current Latchbolt Monitoring/Request to Exit Combination

Example: RX99L

### For Field Installed:

1. Specify switch option (RX, LX, RX-LC, LX-LC).
2. Specify "field".
3. For LX, specify device size 3' or 4'.
4. For LX, specify if used with EL (electric latch retraction) option.
5. To convert an existing RX option to RX2, specify RX-AUX.

Example: LX 3' Field

# VON DUPRIN® Signal Switch RX and LX

**RX** (request to exit) signal switch feature is used to signal the use of an opening from the push side. When the push pad is depressed, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the touch bar. **See Low Current option for computer operated system applications.**

**RX2** (double request to exit) features 2 RX switches.

**LX** (latchbolt monitoring) signal switch monitors both egress and access of an opening. When the latchbolt is retracted, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the latchbolt position. **See Low Current option for computer operated system applications.**

**LC** (low current) option is available for RX and LX switches. **(Most commonly used in computer operated monitoring systems.)** The RX2 is not available in low current.

Signal Switches are available on 22, 33A, 35A, 55, 88, 98, 99 series devices. The low current version is not available with the 55 and 88 series devices.

The INPACT 94/95 series devices are only available with the LX switch option.

The device can be connected to a security console, or may be used as a single door alarm, when used with a horn and power supply. A continuous current electric transfer must be used for transferring the signal from the frame to the door.

Signal Switches can be used in combination with other electrical functions (EL, E).

- RX or RX2 may be combined with the E (electric unlocking) mortise lock device.
- For latchbolt monitoring on a mortise lock device, specify a SS7500 lock.
- LX and RX switches can be combined. Example: LX-RX99L.
- LX, RX or RX2 switches can be used in combination with EL (electric latch retraction) option.

RX, RX2 and LX switches are available for factory or field installation.

**RX and LX switches should not be used to control a load, but as a signaling switch.**

Rim device shown — Refer to 33A/35A or 98/99 series catalog for complete product information, mounting styles, outside trim, finishes, etc.

## To Order, Specify:

### For Factory Installed:

Prefix:	RX	Request to Exit
	RX2	Double Request to Exit
	LX	Latchbolt Monitoring
	LXRX	Latchbolt Monitoring/Request to Exit Combination
	RXLC	Low Current Request to Exit
	LXLC	Low Current Latchbolt Monitoring
	LXRLC	Low Current Latchbolt Monitoring/Request to Exit Combination

Example: RX99L

### For Field Installed:

1. Specify switch option (RX, LX, RX-LC, LX-LC).
2. Specify "field".
3. For LX, specify device size 3' or 4'.
4. For LX, specify if used with EL (electric latch retraction) option.
5. To convert an existing RX option to RX2, specify RX-AUX.

Example: LX 3' Field

## SPECIFICATIONS

### RX or LX:

Switch rated 0.5 amperes @ 24VAC/DC resistive

### Low Current RX or LX

Switch rated 0.05 amperes @ 24VAC/DC resistive

# VON DUPRIN® 98-F/99-F Rim Fire Exit Device

299F Strike

499F Strike  
With 9854/9954  
Mullion

98-F and 99-F rim fire exit devices for all types of single doors up to 4' x 10' (1219mm x 3048mm) or 8' x 10' (2438mm x 3048mm) double doors with 9954 or 9854 mullion, UL listed for Fire Exit Hardware. See page 41 for detailed information on UL listed fire exit hardware label and door opening size information. Devices are ANSI A156.3 – 2001 Grade 1. The 98-F device has a smooth mechanism case and the 99-F device has a grooved case. The rim device is non-handed except when the following device options are used: -2 (Double Cylinder) or SS (Signal Switch). See Opposite page for available outside trim and device functions.

The 98-F/99-F devices are available in the following finishes: US3, US4, US10, US26, US26D, US28, 313AN, 315AN and US32D for the 98-F device only. See page 52 for component finishes and the inside cover for finish chips.

## Sex Bolts

Sex Bolts when ordered with devices may be furnished with screw lengths different than shown in Column B. On page 7, Column B indicates popular sizes. Sex Bolts ordered separately are not furnished with screws. If screws are required refer to chart on page 7 and order screws by description as a separate item. Other screw lengths may be used based on minimum and maximum allowable thread engagement, shown in column "C." Quantity required — refer to device section, quantities differ depending on outside trim.

425 sex bolts are required for 22/88/98/99 series fire rated devices when used on wood door applications. When wood doors are specified for these devices, sex bolts will be added to the device application unless SLM blocking package is specified.

825 sex bolts are required with 98-F/99-F rim devices on wood door applications using EO, NL, TP, K and L outside trims. Two 825 sex bolts will be added to the device application unless SLM blocking package is specified.

### To Order, Specify:

1. Model number
2. Quantity (2 per package)
3. Finish
4. Door thickness other than 1 $\frac{3}{4}$ " (44mm).

Refer to page 7 for A, B and C lengths

# VON DUPRIN® 9847/9947 Concealed Vertical Rod Device

9847/9947 concealed vertical rod device for use on single or double metal doors, UL listed for Panic Exit Hardware. Devices are ANSI A156.3 – 2001 Grade 1. The 9847 device has a smooth mechanism case and the 9947 device has a grooved case. The concealed vertical rod device is non-handed except when the following device options are used: SD (Special Dogging), or SS (Signal Switch). See Opposite page for available outside trim and device functions.

The 9847/9947 devices are available in the following finishes: US3, US4, US10, US26, US26D, US28, 313AN, 315AN and US32D for the 9847 device only. See page 52 for component finishes and the inside cover for finish chips.

# VON DUPRIN® Signal Switch RX and LX

**RX** (request to exit) signal switch feature is used to signal the use of an opening from the push side. When the push pad is depressed, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the touch bar. **See Low Current option for computer operated system applications.**

**RX2** (double request to exit) features 2 RX switches.

**LX** (latchbolt monitoring) signal switch monitors both egress and access of an opening. When the latchbolt is retracted, the switch is activated. These devices are equipped with an internal SPDT (single pole double throw) switch that monitors the latchbolt position. **See Low Current option for computer operated system applications.**

**LC** (low current) option is available for RX and LX switches. **(Most commonly used in computer operated monitoring systems.)** The RX2 is not available in low current.

Signal Switches are available on 22, 33A, 35A, 55, 88, 98, 99 series devices. The low current version is not available with the 55 and 88 series devices.

The INPACT 94/95 series devices are only available with the LX switch option.

The device can be connected to a security console, or may be used as a single door alarm, when used with a horn and power supply. A continuous current electric transfer must be used for transferring the signal from the frame to the door.

Signal Switches can be used in combination with other electrical functions (EL, E).

- RX or RX2 may be combined with the E (electric unlocking) mortise lock device.
- For latchbolt monitoring on a mortise lock device, specify a SS7500 lock.
- LX and RX switches can be combined. Example: LX-RX99L.
- LX, RX or RX2 switches can be used in combination with EL (electric latch retraction) option.

RX, RX2 and LX switches are available for factory or field installation.

**RX and LX switches should not be used to control a load, but as a signaling switch.**

Rim device shown — Refer to 33A/35A or 98/99 series catalog for complete product information, mounting styles, outside trim, finishes, etc.

## To Order, Specify:

### For Factory Installed:

Prefix:	RX	Request to Exit
	RX2	Double Request to Exit
	LX	Latchbolt Monitoring
	LXRX	Latchbolt Monitoring/Request to Exit Combination
	RXLC	Low Current Request to Exit
	LXLC	Low Current Latchbolt Monitoring
	LXRLC	Low Current Latchbolt Monitoring/Request to Exit Combination

Example: RX99L

### For Field Installed:

1. Specify switch option (RX, LX, RX-LC, LX-LC).
2. Specify "field".
3. For LX, specify device size 3' or 4'.
4. For LX, specify if used with EL (electric latch retraction) option.
5. To convert an existing RX option to RX2, specify RX-AUX.

Example: LX 3' Field

## SPECIFICATIONS

### RX or LX:

Switch rated 0.5 amperes @ 24VAC/DC resistive

### Low Current RX or LX

Switch rated 0.05 amperes @ 24VAC/DC resistive

## FACTORY TESTED & PROVEN PERFORMANCE

To make sure we could deliver the Magic-Force™ Operator with all the features to meet the demands of a continually changing market, we conducted the most extensive testing yet. In addition to testing the Magic-Force™ Operator to the industry standard number of cycles, we tested it to break it, then re-engineered it, and re-tested to break it again. Extensive field testing confirmed Stanley's lab test results to prove the Magic-Force™ performance.

*The Magic-Force™ Operator meets:*

- UL Listing - UL 325
- cUL Listing - CSA 22.2 No. 247
- UL Listed Fire Door Operator
- BOCA Listing - 1017.4.3
- ICBO Report - UBC 10-1
- NFPA101 Life Safety Code - Section 5-2.1.9
- ANSI 156.10-1998, Full Energy
- ANSI 156.19-1997, Low Energy
- CSFM - CA State Fire Marshal

As the market demands change, the Magic-Force™ Operator is designed to change right along with them. This operator is setting a new standard in the industry and taking our customers into the 21st century.

# The Versatile Magic-Force™ Operator

- Unique innovative design offers an all-in-one system.
- Non-handed, In-Swing or Out-Swing, Visible or Concealed mounting.
- Configurable for Full Energy & Low Energy applications.
- Simplified Installation & Service.
- Smooth operation, low audible noise.
- Will interface with existing installed products.
- Heavy duty compression spring for unparalleled door control & durability.
- Field adjustable to overcome environmental or facility changes.

***Stanley's Magic-Force™ Operator works in both Full Energy and Low Energy applications. Meets the demands for use in Supermarkets, Department Stores, Hospitals, Airports, Office Buildings, Public Buildings, Schools, Universities and more!***
